

Test Mode Guide

This document explains how test mode works, what you can and cannot do while testing, and how to get the most out of a test drive before purchasing.

What Is Test Mode?

Test mode is a system-wide evaluation environment that lets prospective buyers explore the platform before committing. When test mode is active, the system prepares demo accounts and sample data so you can try every major feature. Certain sensitive operations are blocked or rate-limited to protect the integrity of the demo environment and prevent abuse.

Accessing the Test Environment

Use the following login details to access and test various roles;

ALL LOGIN PASSWORD: Test00000

NovaMart Retail Group (Business plan; full access)

celah68509@smkanba.com CEO

Branches and their staffs

NovaMart Downtown SF

Daniel Brooks: daniel.brooks@novamartgroup.com :Inventory Officer

Ashley Nguyen: ashley.nguyen@novamartgroup.com : Sales Associate

Kevin Patel: kevin.patel@novamartgroup.com : Store Assistant

Testing url; <https://test.paxventory.com/>

Account Hierarchy for Testing

The demo environment is typically set up with the following accounts:

Role: What You Can Do In each account.

CEO: Full access to all store features, settings, subscription management, and user management

General Manager: Access across all branches, reports, analytics, stock, and sales

Branch Manager: Access limited to a single branch -- stock, sales, and branch-level reports

The platform operator will tell you which account(s) are available for testing and their credentials.

NOTE: Some features such as, deleting or adding or deleting too much data in test accounts are restricted. This is to protect the integrity of the test accounts.
